Objectives

The professional world is changing. Management and industrial processes are increasingly interwoven and companies no longer think in terms of traditional divisions. Instead, they are looking for people who are not experts in merely one field but who can build bridges between the different cultures in different departments. Candidates who combine outstanding technical skills with a passion for management are in demand.

Requirements

You should have the following interests and personal qualities:

• Strong interest in business and management topics
• Eager to become an expert in working at the interface between two disciplines – management and engineering/natural sciences
• Enjoy working in interdisciplinary teams and projects

Distinctive Features of the Program

• The program can be followed either in Munich or in Heilbronn.
• The program is available up to 100% in English, so it is particularly suitable for international students.
• In their first two semesters, students learn the basics in management, economics and law. From the third semester onward, students can specialize in an area or areas of their choice.
• As part of the Advanced International Experience module, students may spend a whole semester at one of our esteemed partner institutions abroad.

Career Profile

Our Master in Management program positions students at the interface between technology and management. This prepares them for professional roles in which they form the link between technical staff and management, and management positions that require a solid understanding of industrial processes.

TUM School of Management has excellent relations with many leading companies. Students are able to build links with these partner firms right from the start of the program.

The specializations offered exclusively in Heilbronn foster students’ understanding of managing family-run businesses in a fast-changing and digitized business environment.
